# Granz Realm

Your journey takes you to the four corners of Granz Realm—through tunnels, over battlefields and high above the ground in Dark Lord's airship. Your path will be different depending on whether you control the hero or the heroine.

## RESIDENTS OF THE REALM

They may not always get along, but the seven races of Granz Realm have coexisted for centuries. You'll meet creatures from every race as you explore the world and search for information about the Mana legend and the mighty sword.

### HUMANS

The people of Granz Realm have built towns, cultivated nature and built weapons. Their strongest faith is in themselves.

### THE MANA CLAN

A belief in the Mana goddess has sustained the Mana Clan, even in the face of attacks from Vandole and Dark Lord.

### BEASTS

Living among the humans and the members of the Mana Clan, animals have learned to speak, work and barter.

### DWARVES

Molders of metal, shapers of steel—dwarves are masters in the arts of weapon tempering and armor sculpting.

### MAVOLES

Hailing from Mavolia, the vampirelike Mavoles have joined the world of humans, yet they remain a mystery.

### SPIRITS

The connection between Granz Realm and the world of Mana lies in the spirits who control the forces of magic.

### PLANTS

Rooted in nature, plants thrive in hot houses and produce vegetables. Cactus Essence is key in communicating with plant life.

## Light of Hope, Sword of Mana

Years before anyone in the world can remember, the Mana goddess transformed herself into a tree so that she could oversee nature and the planet's inhabitants. As time passed, the people began to take the goddess for granted, but they continued to receive strength from her luminous magic—her light of hope. Then the villain, Vandole, harnessed the goddess's power for his own purposes and created a civilization. Nature fell by the wayside to make room for progress and technology. When the three Gemma Knights—Gemma, Bogard and Granz—challenged Vandole in an effort to return the world to its original form, a war ensued. Eventually the knights vanquished Vandole using a sword that carried the power of Mana. More time passed and peace prevailed until another threat emerged from the darkness....

## Heroes and Villains

### HERO

The son of Hermann, the consul of Granz Realm, escaped from Dark Lord's grip when the villain stormed the consul's home. Ten years have passed. Now the hero seeks revenge.

### HEROINE

Members of the Mana Clan have not been safe since Dark Lord labeled them heretics. The heroine is one of the last members of Mana Village to survive.

### DARK LORD

The estranged son of Lord Granz, Dark Lord is determined to rule the land on his own terms. The masked man intends to destroy all remnants of the Mana myth.

### JULIUS

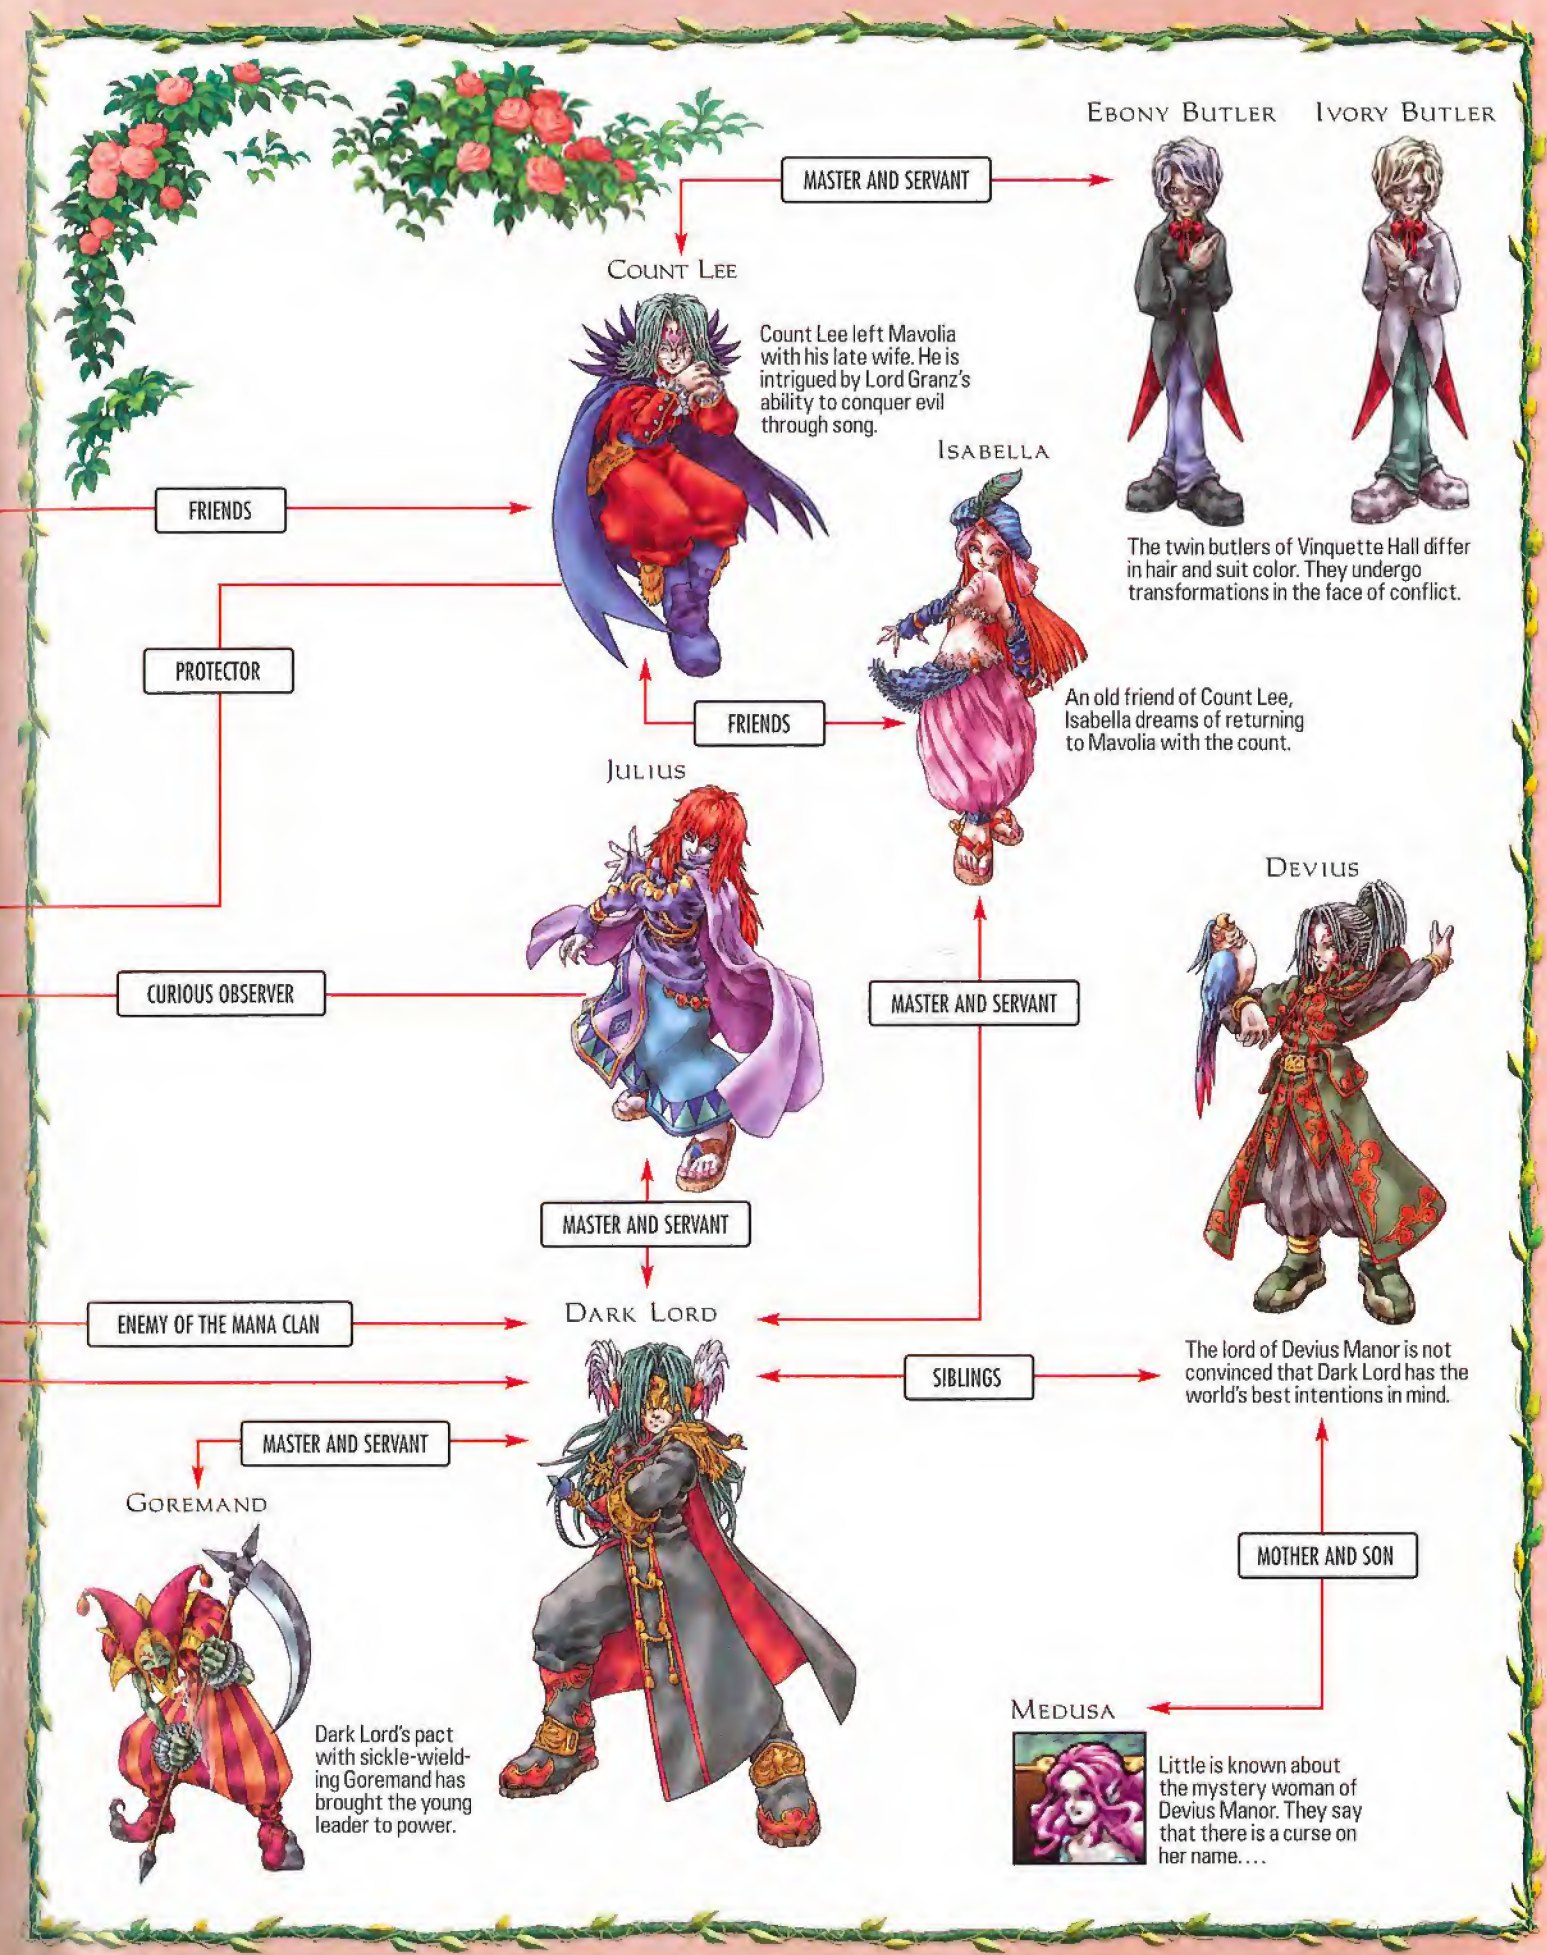

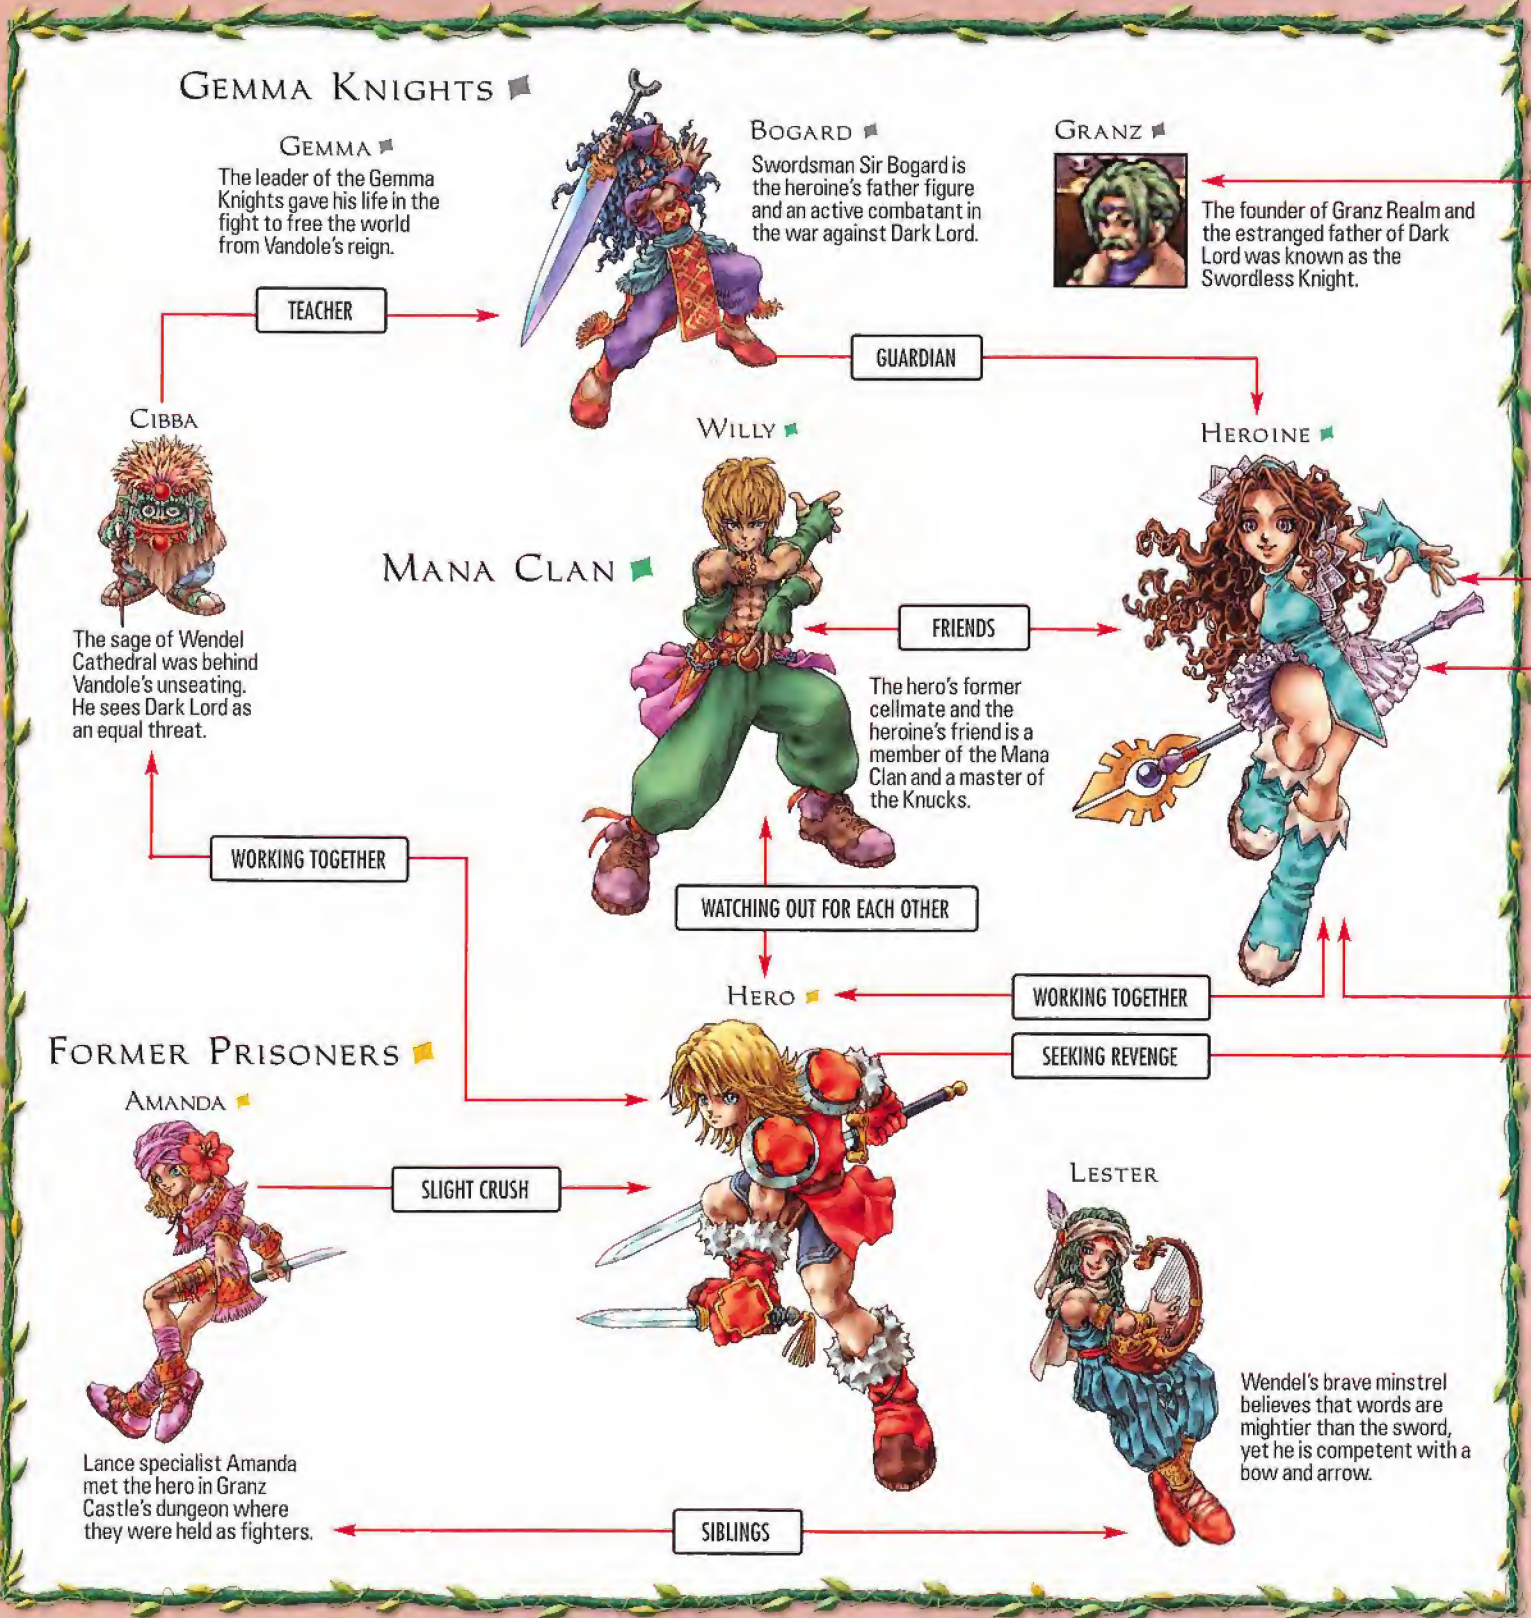

His origins are unknown; his motives are a mystery, but Julius remains the faithful servant of Dark Lord. He has a greater understanding of the power of Mana than his master does.

# CHARACTER CONNECTIONS

Mothers, brothers, enemies and friends—the characters relate to each other in a number of ways, adding depth to the story.

# CONTROLS

Even though you can perform a wide variety of tasks in *Sword of Mana*, the controls are simple and intuitive.

## NINTENDO GAMECUBE CONTROLS

While using a Game Boy Player, you'll find that the GCN control scheme is nearly identical to that of the GBA. The X and Y Buttons substitute for the Select Button.

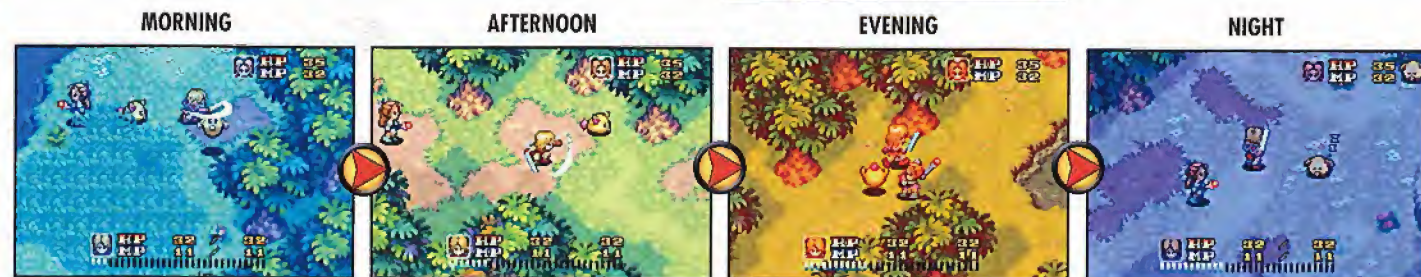

- 1** After your character learns how to jump, press L to leap over ledges. After he or she learns to sit, hold L and A to stop and replenish your magic points.
- 2** Tap the R Button to trigger the selected spirit's healing or protective spell. Hold R for a moment, then release the button to summon the spirit's attack spell.
- 3** Use the Control Pad to move your character, to move the cursor in menus and to make the Ring Command menu spin.
- 4** The A Button is the main action button. Press the button to make your character attack, talk to other characters or interact with objects.
- 5** While you're exploring the world, hold B to make your character walk faster. While you're exploring menus, press B to return to the previous page.
- 6** Press Select (X or Y on the GCN Controller) to switch control between allied characters. While viewing an interface screen, press the button to make a command explanation pop up.
- 7** Press the Start Button to pause the game and bring up the Ring Command menu. Press the button again to resume play.

## Eight Spirits a Week

Time flies in *Sword of Mana*. As you move from one section to the next, you'll notice that the lighting scheme changes to reflect advancing hours—morning, afternoon, evening and night. Some creatures appear and some events happen only at certain times of the day. The days advance, as well—each associated with one of the eight spirits. A spirit's magic is strongest on that spirit's day of the week.

When you press Start to bring up the ring commands, you'll see the day of the week displayed in the lower-left corner of the screen.

# THE RING COMMAND SYSTEM

The innovative Ring Command system allows you to access all of the game's menus with speed and ease.

## Ring around the Hero

Press the Start Button to pause the action and make the main ring menu appear around the player-controlled character. Each icon on the ring represents a menu choice. Press Left or Right on the Control Pad to spin the ring, and press A to choose the top selection.

After you press Start, the ring menu will appear, along with a description of the top item on the menu. As long as the main menu is displayed, a description of the current day and your current location will appear at the bottom of the screen.

When an arrow appears inside the ring, you can see more items by pressing Up and Down on the Control Pad.

## BATTLE MODE COMMANDS

Trait Coins, Spirit Icons and Summons Items are available only in Battle mode. If you search the ring menus during standard exploration mode, the icons for those items will not appear.

- TRAIT COINS
- SPIRIT ICONS
- SUMMONS ITEMS

# Status

## STATUS

If there are two characters in your party, press L or R to switch to the other fighter's status.

Your character's current class appears above his or her portrait. Learn more about character classes on page 20.

The info in the middle of the screen shows the level, hit points, magic points and experience points the character needs to reach the next level.

Spirits become stronger with use. The spirits' current levels are shown next to their icons.

- WISP
- SHADE
- LUNA
- SALAMANDER
- UNDINE
- DRYAD
- JINN
- GNOME

The Power rating shows your character's strength for weapon-oriented attacks.

The Defense rating indicates how well your character can withstand enemy attacks.

Your character's offensive magical strength is reflected in his or her Intelligence rating.

The Mind rating shows your character's strength in casting defensive magic.

The Agility rating indicates your character's ability to avoid attacks and hit targets squarely.

Your character's current cash total appears in the lower-left corner.

A picture of one of the eight spirits marks the day of the week.

Weapon levels increase with use. The numbers next to the weapon icons indicate their current levels.

## NPC BEHAVIOR SETTING

When you have a nonplayer character (NPC) on your team, you can influence his or her attack by adjusting the NPC Behavior Setting. Choose a weapon or magic preference and an aggressive or defensive stance.

### THE HERO'S PARTNERS

## ARMOR LIST

The Armor list for each fighter in your party displays the character's currently equipped armor and accessory. Select each item to see its material, attributes, elemental affiliation and extra effects.

## WEAPONS LIST

The Weapons list displays the current weapons in each character's arsenal. NPCs typically carry only one weapon. Cycle through the weapons to see their stats and press Select to get more information on each item.

# Items

## RECOVERY ITEMS

Among recovery items are Gumdrops and Chocolumps, which replenish hit points for either character in your party. Other items in the category recover magic points, cure poison and physical effects and even bring your NPC partner back to life.

## MYSTERY ITEMS

You can use Mystery Items for unusual effects. Blink Weeds, Potent Posies and Tone Stones attract enemies who rely on sight, smell and hearing respectively. The Amigo Whistle calls one of your Game-Link acquired Amigos for a quick attack.

## TRAIT COINS

Trait Coins temporarily protect the selected character with the defensive power of one of the eight spirits. The Water coin, for example, calls Undine's BubbleBoat spell and encases the character in a floating bubble for a few seconds.

## SPIRIT ICONS

Like Trait Coins, Spirit Icons are effective only in Battle mode. They temporarily put the selected enemy in a vulnerable state. The Undine icon, for example, inflicts the enemy with SnowMan status (immobility) for a moment.

# Weapons

Weapon selection is very important. Creatures are vulnerable to different types of weapons. Study the Monster Album in Popoi's Notebook to discover enemy weaknesses, then select weapons and magic types that do the most damage.

## MEAT ITEMS

Enemies occasionally leave meat after a battle. You can use the meat of a creature to pump up your attack power against a creature of the same general type (Animal, Insect, Bird, etc.). The meat's power lasts for a very limited number of attacks.

## SUMMONS ITEMS

Game Link connections (Amigo sessions) with several different Sword of Mana players will net you Amigo Whistles and Summons Items—cards that you can use to attack all enemies on the screen at once. See page 22 for details.

## OTHER ITEMS

The Other Items category consists of Event Items and a variety of goods that relate to tempering weapons and armor.

### EVENT ITEMS

Many of the game's side quests concern the acquisition of Event Items.

### SEEDS

By planting seed combinations in the hot house, you can grow produce.

### FRUITS

Dwarves ask for fruit when tempering armor items.

### VEGGIES

Dwarves need veggies when tempering weapons.

### RAW MATERIALS

Forge raw materials with weapons to give the weapons more power.

# Accessories

Your main character can wear one accessory at a time. Accessories add to your stats in one (or more) of the five character attribute categories. Some accessories are more powerful than others—some also add to the amount of experience or cash that you can collect by defeating enemies.

Equipped accessory

Stats before the selected accessory switch

Stats after the selected accessory switch

# Magic Rope

If you're in trouble in the thick of battle and you've run out of Recovery Items, you can use the Magic Rope to escape from your current predicament and warp back to the closest save location. If the Magic Rope is not an option, it won't appear on the ring menu.

If your hit points are hopelessly low and there's no end in sight to the current battle, use the Magic Rope to climb out of your bind.

# Spirits

Spirits are the conduit from which all magic spells flow. There are eight types of spirits. After you equip your character with a spirit, you can call the spirit's magic by using the R Button. Tap the button to call a defensive spell. Hold and release the button to call attack magic.

Each spirit can call two types of spells. Offensive spells cost twice as many magic points to call as defensive spells.

### RING COMMAND SHORTCUT

In Battle mode, you can take a shortcut to two of the most useful ring menus. Press Start to bring up the main menu, then press R to switch to Spirits or press L to switch to Weapons.

# Popoi's Notebook

## WORLD MAP

As you explore the world, the map in Popoi's Notebook fills out to show where you've been. The cursor defaults to your current location. Move it to see the names of the other locations on the map.

## POPOI'S NOTES

After you learn something important about the world or game systems, the information is transferred to Popoi's Notes. There are 29 notes in all.

## MONSTER ALBUM

Once you've defeated a creature of a particular type (not counting bosses or minibosses), an entry for that creature will appear in the Monster Album. Consult the entries to discover each creature's strengths and weaknesses.

## AMIGO LIST

Every time you connect with a different Sword of Mana player, you'll put that player's character on your Amigo list. The list shows the character's level of experience during your last connection.

# WEAPONS

Knowing which weapons to use in each scenario will contribute significantly to your success. Slash, jab and bash your way to victory.

## NINE WEAPONS

### ⚔️ SWORD

The hero's default weapon is a slashing sword. It is equally balanced in attack power, evasive ability and accuracy.

### 🌀 FLAIL

The jabbing flail has a long reach. You can grab onto objects on the other side of gaps, then fly to the other side.

### 🚩 LANCE

A fast weapon with the Jab attack trait, the lance is strong, but its evasive ability is low.

### 🪄 STAFF

The staff is exclusive to the heroine. A bashing item by trait, the weapon is not as strong or reliable as the hero's sword.

### 🌿 SICKLE

The sickle is slower than the sword and not nearly as accurate, but its wide range allows you to attack enemies at all angles.

### 🪓 AXE

The slashing axe is almost as slow as the sickle, but it's much stronger. Use it to attack lumbering enemies.

### 👊 KNUCKS

The first bashing weapon that the hero collects allows him to attack quickly and dodge enemy attacks easily.

### 🏹 BOW

The bow fires arrows that fly in an arc, allowing you to attack high-flying enemies. It's strong and incredibly accurate.

### 🔨 MACE

While not quick, the mace is mighty and it has a relatively long attack range. Use it to defeat armored enemies.

## THREE TRAITS

Weapons are split into three attack categories—Slash, Bash and Jab. If an enemy is vulnerable to attacks from a particular weapon, it is generally vulnerable to all other weapons that carry the same attack trait. The hero begins with a slashing weapon, while the heroine begins with a bashing device.

## PUT THE POW IN POWER

Your character's stat screen shows the current level of each weapon in his or her arsenal. The more you use a weapon, the more it will rise in attack level and usefulness.

When your weapon increases by a level, a message will appear above your character.

It's a good practice to build the levels of at least one weapon of each attack trait.

# SPIRITS

By collecting spirits, you'll be able to use magic to attack enemies, defend your character and break stone seals.

## MAGIC

Each spirit is capable of casting an attack spell and a support spell. Tap the R Button to call the currently equipped spirit's support spell. Hold the R Button until the spirit's icon appears, then release the button to summon the spirit's attack spell.

The power of most support spells fades after several seconds.

The shape and trajectory of an attack spell blast depends on the character's currently equipped weapon.

### 🌟 WISP (LIGHT ATTRIBUTE)

	ATTACK	The Wisp's white light is strong against Fowl-type creatures. It afflicts some targets with a Charm effect.
	SUPPORT	The HealingLight spell gives the player-controlled character a quick hit-point boost. By advancing through certain classes, you can increase the strength of the spell.

### 🦋 SHADE (DARK ATTRIBUTE)

	ATTACK	Flora-type creatures wilt under the power of Shade's attack. The spell's side effect is Darkness.
	SUPPORT	Use Shade's Silhouette to transform your character into a shadow that only enemies who rely on hearing will be able to detect.

### 🌙 LUNA (MOON ATTRIBUTE)

	ATTACK	Magical creatures, such as the Polter Box, fall to the power of the Luna. Its side effect is Small (Wimp).
	SUPPORT	Mooglemorphosis transforms your character into a teddy-bearlike creature ignored by all enemies except those who rely on smell.

### 🔥 SALAMANDER (FIRE ATTRIBUTE)

	ATTACK	The fire-blasting Salamander spell scorches Aquan creatures and inflicts some targets with FireMan.
	SUPPORT	Cast PowerUp on your character to double the fighter's physical attack power for a few moments.

### 💧 UNDINE (WATER ATTRIBUTE)

	ATTACK	Amorph and Demon creatures are washed away by Undine's waterlike attack. The side effect is SnowMan.
	SUPPORT	The BubbleBoat spell encases your fighter in a floating sphere undetected by all enemies except those who rely on sight.

### 🌴 DRYAD (WOOD ATTRIBUTE)

	ATTACK	The Dryad's spell is most effective against Amorph and Oddball creatures. Some are inflicted with Sleep.
	SUPPORT	If you're going up against enemies who primarily use magic to attack, you can halve the effect of their spell by using PsychicShield.

### 🌀 JINN (WIND ATTRIBUTE)

	ATTACK	The Jinn's windy spell blows away enemies of the Flora and Insect varieties and triggers a Numb effect.
	SUPPORT	If you have a lot of ground to cover, cast the SpeedUp spell to make your character run without your having to hold the B Button.

### 🧝 GNOME (EARTH ATTRIBUTE)

	ATTACK	The Gnome's grounded attack buries Fowl and Demihuman creatures. Its side effect is Petrify.
	SUPPORT	The D-Fence spell doubles your defense against physical attacks for a short time. Use it when you're surrounded by burly enemies.

## MAGIC MOVES

Attack spells generate blasts of magic that vary wildly in their trajectory, depending on which weapon you have equipped. The examples below show the magic attack trajectories associated with

each weapon. The sword offers the most concentrated magic attack, but its range is severely limited.

## TALK TO THE TOWNIES

The story unfolds and your pack gets heavier when you visit towns for information-gathering and shopping expeditions.

### GENERAL STORES

Every town and village has a general store where you can buy and sell goods. The same Recovery Items are for sale in every store. You can buy them one at a time or in large quantities. The available accessories vary from store to store, but every store tends to sell one accessory for each of the five jewelry-enhanced attributes—Power, Defense, Intelligence, Mind and Agility.

When you speak to the shopkeeper, the first choice that you have is to buy or sell items. Then you must select Items or Accessories. You can generally sell items for half of their purchase price.

### NICCOLO — THE TRAVELING SALESMAN

Niccolo shows up in the strangest places, when you least expect him. He offers recovery items of the variety that you'll find in any store, but he also has a few one-of-a-kind items that you just can't pass up, including Popoi's Notebook and Cactus Essence.

When Niccolo pops up, the game switches to standard Exploration mode with no enemies.

Two of Niccolo's unique items are accessories—Belle Bell and Chimpfish Iris.

### BLACKSMITHS

Dwarves set up shop in most population centers. You can learn the dwarf perspective of the world's events from the helmeted hairballs and have them temper your weapons and armor. Before you can get the dwarves to take your hardware you must grow produce in the hot house.

Select Weapons or Armor, then select a particular piece from your arsenal. The tempering dwarf will ask you for a fruit or vegetable, then he will temper your item with the produce.

### INNS

Inns are great places to catch up with the villagers and fellow travelers for information about the story and side quests. You can also pay to stay the night. A good sleep will restore your character's hit points and magic points, and give the fighter Best status temporarily.

After a night's stay, you'll enjoy Best status—a combination of PowerUp and D-Fence effects.

### RESIDENCES

By exploring every building, you'll meet people who can help you understand events that are important to the story or offer you side quests. Most side quests have you finding an item or group of items and taking them back to a villager. Speaking to townspeople can also trigger important events.

In every village that you explore, you'll find at least one person who wants to send you on a side quest.

## THE HOT HOUSE

With a little Cactus Essence and a flower pot, you can create a fully formed hot house. Enter for info and fresh produce.

### LI'L CACTUS

Your prickly potted pal in the hot house lobby will not offer much information when you speak to him. But after your conversation (and your exit), he'll scribble notes on a cactus diary in the corner. When you return for another visit, read the notes to learn details about the story.

Speak to Li'l Cactus, then leave the hot house. The shy houseplant will hop over to his diary and write notes about your meeting and the game story. Consult the diary for information during any of your return visits to the hot house.

### ORCHARD

An old growth named Trent resides in the hot-house's orchard. He'll ask you for any combination of two seeds—the kind that you can find in treasure chests. On your next hot-house visit, you'll find the product of the seed fusion in the area above Trent.

You'll find several types of seeds during your journey. Give the seeds to Trent in pairs. Later, when you return to the hot house, you will be able to cut down and collect a fruit or vegetable that grew from the seed pair.

### WATTS HAPPENING

After you meet adventuring dwarf Watts, he'll take up residence in the hot house and provide a weapon- and armor-forging service. Other dwarf blacksmiths temper items with produce exclusively, but Watts is the only one who also forges items with raw materials, adding strength in several categories.

Watts can fuse battle items with other materials using his forging skills.

After you select a piece of armor or a weapon, have Watts meld it with one of your raw materials.

## STEP INTO BATTLE

The action heats up when you enter the battlefield. In addition to fighting enemies, you'll tackle several other types of activities.

## Battlefield Action

### CUTTING GRASS

You can use any weapon that carries a Slash attack trait to cut tall grass. By slicing through the greenery, you can find many useful items.

### FLYING WITH THE FLAIL

Your journey through the Marsh Cave will earn you the flail, the Jab-trait weapon that can carry you across water. Hook on to a post and soar.

### TREASURE CHESTS

Defeated enemies sometimes leave behind booby-trapped treasure chests. Press the A Button to trigger a spinning ring of icons. Press A again to make the ring stop. The top icon will either trigger a trap or let you open the chest with no consequence.

### JUMPING

After your journey to Cascade Cottage, outside of Topple Village, you'll learn how to jump. Press the L Button to leap over short ledges.

### STONE SEALS

Stone seals block key passages in caves. To break a seal, you must hit it with a magic attack of the type that matches the seal's etchings and coloring.

### TINY TAPPER

Some cave entrances are too small to walk through when your character is at full size. Use the Tiny Tapper to shrink your fighter, then slip through the cracks.

### SITTING

On your way to Vinquette Hall, you'll learn how to sit and replenish magic points by holding A and L. A strong magic aptitude will increase your point-replenishing rate.

### METABALLS

Three types of Metaballs block passages in caves and dungeons. Each one is associated with one of the attack traits. You can break the Metaballs by hitting them with weapons that have matching traits.

### MANA STATUES

Statues that depict the Mana Goddess allow you to save your progress. Silver statues that have deteriorated over time only save your progress; gold statues save, plus replenish hit points and magic points.

## Battle Mode

Moments after you enter an area where battles can take place, your character will produce his or her weapon and Battle mode will kick in. Prepare for enemy attacks.

The current hit points and magic points for the support fighter appear in the upper-right corner.

The player-controlled character's current point totals and current maximum point totals are displayed in the lower-center section of the screen.

If the Deathblow gauge is full, you can pull off a big attack. Hold A, then release.

## COMBINATION ATTACKS

Some weapons, such as the sword, staff and spear, allow you to pull off combo moves. Press A to initiate the attack, then press the button again when your weapon is fully extended. You can string together up to three blows.

## DEATHBLOWS

Your Deathblow gauge grows every time an attack connects. When the gauge is topped out, your character will flash. Hold A for a second, then release to pull off a big move. The flashing effect will last for about a minute.

## LEVELING UP

As you defeat enemies and gain experience, you'll level up. Every time you do so, you can increase stats by selecting one of five fighter types. Type selections contribute to class changes. See page 20 for class change details.

## PHYSICAL EFFECTS

	<b>BEDRAGGLED</b>	A Bedraggled state decreases a fighter's defense against physical attacks. Take a Prestoveggie to recover.
	<b>BEWITCHED</b>	When a character is Bewitched, his or her defense against magical attacks is reduced. A Prestoveggie provides the cure.
	<b>CHARM</b>	A Charmed fighter will attack his or her partners. The cure for the condition is a Stardust Herb.
	<b>CONFUSION</b>	When Confusion sets in, the character's movement directions will be reversed. A Stardust Herb can correct the problem.
	<b>DARKNESS</b>	Darkness reduces the fighter's accuracy. Use a Stardust Herb to clear away the cloud.
	<b>DEATH</b>	When your partner's hit points are depleted, he or she will float across the screen like a ghost. Use an Angel Grail to revive the warrior.
	<b>FIREMAN</b>	The FireMan effect makes the afflicted character unable to fight and causes damage over time. Cure the ailment with a Stardust Herb.
	<b>NUMB</b>	The Numb effect keeps the fighter from attacking. A Stardust Herb will take the numbness away.
	<b>PETRIFY</b>	A warrior hit with a Petrify effect loses hit points and turns to stone. The only cure is a Stardust Herb.

	<b>POISON</b>	Poison hits the afflicted warrior with damaging blows. You can stop the hurting with a Prestoveggie.
	<b>POSE</b>	The Pose effect freezes the fighter. Use a Stardust Herb to revive the character's mobility.
	<b>POWERDOWN</b>	PowerDown decreases the fighter's physical attack strength. A Prestoveggie cures the ailment.
	<b>SILENCE</b>	Silence makes the character unable to communicate with the spirits for magic casting. A Stardust Herb is the cure.
	<b>SLEEP</b>	The Sleep effect knocks out the afflicted fighter. Use a Stardust Herb to revive the snoozer.
	<b>SNOWMAN</b>	Covered in protective ice, the SnowMan-frozen fighter can't move or take damage. Use a Stardust Herb to initiate a thaw.
	<b>SPEEDDOWN</b>	SpeedDown slows the fighter's walking and fighting speeds. A Prestoveggie will lift the spell.
	<b>TOXIN</b>	Toxin has the same damaging effect as Poison. A Prestoveggie removes the venom.
	<b>WIMP</b>	The Wimp effect reduces the size, fighting strength and defenses of the battler. Use a Stardust Herb to reverse the curse.

# CLASS CHANGES

Your level-up type selections build up to class changes. After five selections of a particular type, you'll establish a class and a track toward more class changes (as illustrated in the following tables). Advanced classes give your character new strengths.

## ACQUIRING AMIGOS

Game Link connections with other *Sword of Mana* players give you in-game Amigos. Use them for surprise attacks and summons.

### MAKE CONNECTIONS

Connect two *Sword of Mana*-equipped Game Boy Advance systems using a Game Boy Advance Game Link cable. Select the Communication entry in both games, then choose characters to introduce to one another.

### CALL YOUR FRIENDS

Once your character has at least one Amigo, you'll find an Amigo Whistle in your Mystery Items menu. Use the whistle to call on your character's Amigo for a pogostick bouncing attack. The stronger the Amigo was during your last connection, the more powerful the attack will be.

Your character's first Game Link connection earns an Amigo Whistle.

You can call Amigos once per game day. If your character has multiple Amigos, his or her pals will attack as a group.

### SEVEN WISDOMS

If you have a lot of friends, you can earn rare and powerful items. Summons Items call the power of the Seven Wisdoms. Each spirit damages every enemy on the screen and causes a side effect. The table to the right reveals how many different Amigos you must meet to collect each item.

After you reach an Amigo milestone, you'll collect a valuable Summons Item.

AMIGOS	SUMMONS ITEM	ATTRIBUTE	SIDE EFFECT
5	Selva Card	Wind	Numb
10	Pokiehl Card	Fire	FireMan
15	Tote Card	Water	SnowMan
30	Rosiotti Card	Wood	Sleep
50	Olbohn Card	Moon	Wimp
75	Gaia Card	Earth	Petrify
100	Matilda Card	Light	Charm

Julius's first incarnation often surrounds himself with a magical shield. Keep an eye on him, but don't attack—he's invincible when the shield is up.

# ORCHARD HARVEST

By collecting seeds and giving seed pairs to Trent in the hot house's orchard, you can grow item-tempering fruits and veggies.

Dwarves temper your armor with fruit and your weapons with veggies. Every time they temper an item, it advances by one point in one of four categories as shown in the first two tables below. The remaining tables show which fruits and veggies spring from seed combinations on particular days of the week. For example, on Luna day, two Round seeds fuse to grow Bellgrapes. On Salamander day, the same seeds produce Lilipods.

# WORKING WITH WEAPONS

After Watts takes refuge in the hot house, he'll offer to forge your weapons and armor with raw materials to make new pieces.

## Forging Armor

Watts knows weapons and armor. After giving him raw materials, a selected piece from your arsenal and a good amount of cash, you'll walk away with a more powerful item. Some forged armor blocks certain effects, while forged weapons create effects.

Fusing raw materials with the tools of battle, Watts prepares you and your partners for war.

## SWORD SECRETS

Sword of Mana's RPG elements shine through in its secrets and statistics. With persistence, you can uncover Mana's hidden features.

### DARK MONSTERS

The Monster Album in Popoi's Notebook keeps track of the number of monsters of a particular type that you have defeated. After you defeat 999 specimens of a given variety, the number will roll back to zero and the monsters of that type will turn into much stronger, much more vicious version of themselves. Their appearances will change also—from bright, colorful creatures to charcoal gray menaces that will give your characters a run for their money.

### NICCOLO'S BARGAINS

If you make 250 separate purchases from Niccolo, he'll offer a new line of items for sale under the Special entry in his ring menu. The bargains include raw materials and rare accessories, such as the Cardinal Eye, the Draupnir and the Flameflicker. If you want to increase your transactions with Niccolo, purchase a Gumdrop from him, press B repeatedly to back out of the transaction, then purchase another Gumdrop, repeating the process until you run out of cash.

### MAGIC CLASS ENHANCEMENTS

The class changes that branch off from Magician- and Sage-type development add to the strength of your magic spells. If you build your character according to the charts on pages 20 and 21, you can reach classes, such as Arch Mage and Rune Seer, that multiply the attack power of one of your spirits by a factor of eight. It's not quite the same as having eight spirits of one type, but it's close.

### RARE MONSTERS

The rarest of all monsters are the cyclops creatures. Each variety of cyclops appears at only one time of the day, one day a week, in particular places—as seen in the following table. The one-eyed beasts have identical stats and weapon vulnerabilities, though their magic vulnerabilities vary from one type to the next. They leave rare items behind.
